Paul W. Talbot

3201 Florian Ave.
Idaho Falls, ID 83401
(509) 713-2842

EDUCATION

Doctor of Philosophy, Nuclear Engineering
University of New Mexico, Albuquerque, New Mexico, GPA 4.08 — December 2016

Master of Science, Nuclear Engineering
Oregon State University, Corvallis, Oregon, GPA 3.75 — March 2013

Bachelor of Science, Physics
BYU-Idaho, Rexburg, Idaho, GPA 3.84 — April 2010

PROFESSIONAL EXPERIENCE

Idaho National Laboratory, Idaho Falls, ID
RAVEN project — Fall 2014 - Present

- Integrated energy system energy, economics modeling and analysis
- Stochastic gradient descent optimization methods
- High-dimension model reduction and sparse grid collocation
- Agile development, maintenance, refactoring, quality assurance
- Continuous integration implementation
- RAVEN, Python, Conda, Bash, C++

MOOSE projects — Summers 2010, 2012

- Worked within multiphysics object-oriented software environment (MOOSE)
- Used method of manufactured solutions to test functionality
- Optimized polynomial fits for interstitials and voids in MARMOT

Los Alamos National Laboratory, Los Alamos, NM — Summer 2011
CCS-2

- Extrapolated existing pseudo-analytic single-dimensional discrete maximum principle for the implicit Monte Carlo equations governing radiative heat transfer to include multiple dimensions, non-equilibrium conditions, and mutligroup energies.
- Implemented predictive capacity into use codes at LANL to predict boundedness in choices of spatial and time discretization.

AREVA, NP
BWR Neutronics — Summers 2008, 2009

- Assisted in benchmarking software version update
- Used simulation codes CASMO4 and MICROBURN-B2
- Researched effect of BLEU fuel in Browns Ferry Unit 2 rector

COMPUTING SKILLS

Extensive use of Python (Pandas, Xarray, SciKitLearn, Object and Functional), Git, Bash
Experience with C++, MatLab, Visual Basic
